

REMOTE WORK TECHNOLOGIES

Hydrogen is the “**GREEN**” alternative for getting rid of carbon deposits

▶▶▶ **NO CHEMICALS, totally safe for ALL vehicles!** ◀◀◀

REGAIN PERFORMANCE

Removing carbon deposits improves overall vehicle performance and drivability

REDUCES EMISSIONS

Removing harmful deposits from the engine reduces emissions, for a cleaner/greener drive

BETTER FUEL MILEAGE

Without carbon deposits, combustion is much better, resulting in increased power and reduced fuel consumption

Why Does it Work So Well?

Hydrogen works better than chemicals, because rather than washing the carbon deposits with chemicals, we use chemical attraction/reaction to remove them (like a magnet & steel)

What Does That Mean to you?

HAPPY CUSTOMERS = BETTER CSI SCORES!

Our system **eliminates problems** associated with after treatment issues

- ▶▶▶ No more check engine light come back ◀◀◀
- ▶▶▶ No more plugged up catalytic converters ◀◀◀
 - ▶▶▶ No more bent valves ◀◀◀
- ▶▶▶ Improves diesel turbo lag problems ◀◀◀
- ▶▶▶ Helps with diesel regen issues by cleaning DPF ◀◀◀
